RE: North Side Sidewalk Project

Dear Resident:

The Village of Villa Park will be installing new sidewalk this fall as a part of its **North Side Sidewalk Project**. Construction of this project is tentatively scheduled to begin the week of September 4, 2016. The project limits are Armitage Avenue on the north, North Avenue on the south, Harvard Avenue on the west and Ardmore Avenue on the east. New sidewalk will be installed on selected streets within the project area. Some of the selected streets will have new sidewalk installed on both sides of the street, while others will have new sidewalk installed on only one side. A map depicting the locations where new sidewalk will be installed is provided on the reverse of this letter. More specific information on this project can be found on project webpage on the Village of Villa Park's website at <http://www.invillapark.com/519/North-Side-Sidewalk-Project>.

For residents who will have new sidewalk installed in front of their property, the contractor will be excavating in the Village's right-of-way in front of the property in preparation for the installation of the new sidewalk. If the new sidewalk will cross the driveway, then a portion of the driveway will be removed to accommodate it. Installation of the new sidewalk will follow any necessary removal and preparation work. Any part of the driveway that is removed to accommodate the sidewalk will be restored following installation of the new sidewalk.

Residents who will have new sidewalk across their driveways will not have access to their driveways for a period of approximately two to three weeks (weather and other circumstances permitting) between the time that the driveway is removed and the time that the driveway is restored. During this time, residents will be allowed to park overnight on streets, where permitted. The Villa Park Police Department will be notified of the need for this overnight parking, and should accommodate residents accordingly. Those residents who will have restricted driveway access as a result of this work will be notified by an additional letter prior to this work taking place.

This work will require the removal of some trees, landscaping, fences and other items in the Village parkway prior to the start of construction. Village crews will be completing necessary tree removal over the next few weeks. Trees which are to be removed will be marked with an "X" prior to removal. Residents who have landscaping, fences or other items in the Village right-of-way that need to be removed will be notified by a separate letter of the need for this removal, and will have the option of removing the items themselves, or of having them removed by the Village or its contractor.

The contractor for this project is Triggs Construction, Inc., of West Chicago, Illinois. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us at the number listed.
