**RE: Plymouth Street Improvement Project (Ardmore to Villa)**

Dear Resident:

Construction of the Village of Villa Park's **Plymouth Street Improvement Project (Ardmore to Villa)** will be starting within the next few weeks. Preliminary construction efforts, including construction layout, locating of underground utilities, installation of traffic control, and mobilization of equipment and materials, will take place prior to construction. These preliminary efforts should take several days to complete, and full construction operations will follow.

The Plymouth Street Improvement Project (Ardmore to Villa) consists of improving Plymouth Street from Ardmore Avenue to Villa Avenue in the Village of Villa Park which includes hot-mix asphalt (HMA) resurfacing and HMA pavement reconstruction. The total length of improvements is 2,594 feet (0.49 mile). The pavement resurfacing areas will consist of 2" of HMA surface course and ¾" of polymerized leveling binder. These resurfacing areas will also have pavement patching and spot curb and gutter replacement based on field conditions. The pavement reconstruction areas will be composed of 2" HMA surface course, 4" HMA binder course and 6" aggregate base course supported on a geotechnical fabric. In addition, there will be sidewalk replacement at intersections to meet the Public Right-of-Way Accessibility Guidelines (PROWAG), driveway reconstruction, drainage and utility improvements, pavement markings, signing, erosion & sediment control, and landscaping. This project is being funded by a State grant administered by the Department of Commerce and Economic Opportunity (DCEO) which requires participation goals for Minority Business Enterprise (MBE), Women Business Enterprise (WBE), and Veterans Business Enterprise (VBE) as outlined in the Contract Documents. More specific information on this project as well as project related documents can be found on the Village of Villa Park's "Plymouth Street Improvement Project" page located at <http://www.invillapark.com/820/Plymouth-Street-Improvement-Project>.

Traffic within the project area will be affected by construction efforts. **Parking will not be permitted on project streets during the work day.** There may be a need for temporary road closures throughout the area as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for extended periods of time while work is taking place in front of those particular properties. **Residents should have access to their driveways overnight throughout most of the project, with the exception of several weeks' time when the curb and gutter and driveway apron installations are taking place. During these times, residents will be allowed to park overnight on adjacent streets, where permitted.** We ask that motorists follow all posted signs.

PLEASE SEE REVERSE

## COVID-19 CONCERNS

As a result of COVID-19, the Village is requesting that communications during this project be limited to phone and e-mail as much as possible. It is recommended that residents avoid personal contact with contractor or engineering personnel on site. Residents in the project area are encouraged to take advantage of several other means of corresponding and receiving information during this time:

- Call the Village of Villa Park Public Works Department at (630) 834-8505, or e-mail [engineering@invillapark.com](mailto:engineering@invillapark.com) with any questions or concerns that you may have.
- Send an email to [engineering@invillapark.com](mailto:engineering@invillapark.com) requesting to be added to the project e-mail list if you would like to receive periodic e-mail updates regarding the project.
- Sign up for [CodeRED](#), the Village's public notification system, to receive notice of scheduled project activities that may cause additional inconvenience.

The general contractor for this project is Brothers Asphalt Paving, Inc., of Addison, Illinois. The Village will also have a consultant engineer on site throughout the project to oversee and coordinate construction. All questions and comments regarding this project should be directed to the Village of Villa Park Public Works Department by one of the means of communication listed in the bullet points above. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to reach out.
