**RE: South Michigan Avenue Improvement Project  
Madison Street to Jackson Street**

Dear Resident:

The Village of Villa Park is in the process of initiating engineering design of the **South Michigan Avenue Improvement Project**. This project is expected to consist of street improvements, storm sewer installation, and other improvements on the portion of South Michigan Avenue from Madison Street to Jackson Street.

As a part of this process, the Village has solicited a proposed engineering agreement for the design of this project from engineering consulting firm V3 Companies of Woodridge, Illinois. This engineering agreement will be submitted for consideration by the Village of Villa Park Village Board at the board meeting to be held this Monday, October 10, 2016, at 7:30 PM in the council chambers at Villa Park Village Hall, located at 20 South Ardmore Avenue.

The engineering agreement, if approved, would include the design of full bidding documents, including plans, specifications and estimates, for the South Michigan Avenue Improvement Project. The agreement would also include the preliminary engineering design of storm sewer and stormwater detention for other areas outside the South Michigan Avenue project limits. Bidding and construction of the South Michigan Avenue Improvement Project are expected to follow the completion of engineering design.

Additional information about this project can be found on the Village of Villa Park's "South Michigan Avenue Improvement Project (Madison to Jackson)" page located at <http://www.invillapark.com/711/South-Michigan-Avenue-Madison-to-Jackson>.

All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. If you have any questions or would like additional information, please do not hesitate to contact us.
