**RE: South Monterey Stormwater Quality Project**

Dear Resident:

Construction of the **South Monterey Stormwater Quality Project** is tentatively expected to begin the week of October 8<sup>th</sup>, 2018.

This project consists of the installation of 12 bio-retention systems within the existing drainage ditch on South Monterey Avenue between Washington Boulevard and Madison Street.

The project will take three to four weeks to complete. South Monterey will be open for vehicular traffic during construction activities. In order to facilitate construction operations, signs prohibiting street parking at certain locations may be posted on Monterey Avenue. There may be a need for temporary road closures throughout the project as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for short periods of time while work is taking place in front of those particular properties. Residents will have access to their driveways overnight throughout the project. Rest assured, we will work with residents to keep them informed of any planned work efforts which may cause additional inconvenience.

The general contractor for this project is McGinty Bros., Inc. of Long Grove, Illinois. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us.
