## **RE: Washington Street Green Infrastructure Improvements Public Information Meeting**

Dear Resident:

We would like to extend to you an invitation to attend a public information meeting which will be held for the Washington Street Green Infrastructure Improvements. This project will be a first step towards reducing flooding in the Washington Corridor and adjacent areas. The Village is holding this meeting in an effort to better communicate with residents and to offer more extensive information about the project. In addition to an overview of the project and its benefits, the meeting will also cover the expected construction schedule and the anticipated impact to residents.

The meeting will be held at 5:00 PM on Tuesday, June 27, 2017, in the Boardroom at Village Hall, 20 South Ardmore Avenue. All are invited to attend, and we encourage anyone with questions or concerns to come and share their thoughts. Representatives will also be available from both the general contractor and the engineering consultant firm that is assisting with the project.

We would also like to make you aware that a page has been created on the Village's website for the Washington Street Green Infrastructure Improvements. The page can be accessed at <http://www.invillapark.com/690/Washington-Street-Green-Infrastructure-I>. The page contains general information on the project, additional methods of contacting the Village with questions or issues, a running list of project updates, and a list of project materials available for download.

All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. As always, we thank you for your continuing patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us at the number listed.
