RE: 2020 Street Improvement Project

Dear Resident:

Construction of the Village of Villa Park's **2020 Street Improvement Project** will be starting within the next few weeks. Preliminary construction efforts, including construction layout, locating of underground utilities, installation of traffic control, and mobilization of equipment and materials, will take place prior to construction. These preliminary efforts should take several days to complete, and full construction operations will follow.

The 2020 Street Improvement Project consists of the rehabilitation of various streets by means of selected pavement rehabilitation methods. Streets included are Vermont Street from Ardmore Avenue to Villa Avenue, Park Boulevard from Princeton Avenue to Ardmore Avenue, and several public alleyways throughout the Village. More specific information on this project as well as project related documents can be found on the Village of Villa Park's "2020 Street Improvement Project" page located at <http://www.invillapark.com/880/2020-Street-Improvement-Project>.

Traffic within the project area will be affected by construction efforts. **Parking will not be permitted on project streets during the work day.** There may be a need for temporary road closures throughout the area as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for extended periods of time while work is taking place in front of those particular properties. **Residents and businesses should have access to their driveways overnight throughout most of the project, with the exception of several weeks' time when the curb and gutter and driveway apron installations are taking place. During these times, residents will be allowed to park overnight on adjacent streets, where permitted.** We ask that motorists follow all posted signs.

COVID-19 CONCERNS

As a result of COVID-19, the Village is requesting that communications during this project be limited to phone and e-mail as much as possible. It is recommended that residents avoid personal contact with contractor or engineering personnel on site. Residents in the project area are encouraged to take advantage of several other means of corresponding and receiving information during this time:

- Call the Village of Villa Park Public Works Department at (630) 834-8505, or e-mail engineering@invillapark.com with any questions or concerns that you may have.
- Send an email to engineering@invillapark.com requesting to be added to the project e-mail list if you would like to receive periodic e-mail updates regarding the project.
- Sign up for [CodeRED](#), the Village's public notification system, to receive notice of scheduled project activities that may cause additional inconvenience.

The general contractor for this project is A Lamp Concrete Contractors, Inc., of Schaumburg, Illinois. The Village will also have a consultant engineer on site throughout the project to oversee and coordinate construction. All questions and comments regarding this project should be directed to the Village of Villa Park Public Works Department by one of the means of communication listed on the previous page. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to reach out.
