**RE: Washington Area Combined Sewer Separation Project – Section Two
Project Introduction**

Dear Resident:

This letter is to inform you that the Village has begun the process of planning and designing the second section of the **Washington Area Combined Sewer Separation Project**. Construction has already begun on the first section, the Monterey Avenue Improvement Project.

The project area includes East Washington Street from Illinois to Monterey, and South Euclid Avenue from Madison to Highland. Preliminary design efforts are underway, and you may see crews periodically working in the area. Construction is tentatively expected to begin within the next one to two years.

The project will include the separation of the existing combined sewer with a new storm sewer main, sanitary sewer spot repairs, ADA sidewalk improvements, and the removal of existing pavement and rehabilitation of streets within the project area. General information, as well as periodic updates on the project, can be found on the dedicated webpage located on the Village website: <https://www.invillapark.com/1023/Washington-Area-Combined-Sewer-Separatio>

In addition to the website, the Village uses a notification service called CodeRED to provide project information and updates, including notices about road closures, driveway access restrictions, etc. These updates are provided in various ways, including email, text messages, and the CodeRED mobile app. If you are interested in signing up for CodeRED, please use the QR code below or follow the link to complete the process: <https://arcg.is/fiiHG>

If you have any questions or would like additional information, please do not hesitate to contact the Village of Villa Park Engineering Division by email at engineering@invillapark.com or by phone at (630) 834-8505.
